	NUMBERS	
RE18LDF	1/8" FIGURES	0-9
RE316LDF	3/16" FIGURES	0-9
RE14LDF	1/4" FIGURES	0-9

	LETTERS	
RE18LDF	1/8" LETTERS	A-Z
RE316LDF	3/16" LETTERS	A-Z
RE14LDF	1/4" LETTERS	A-Z

**ENGINE PRE-LUBER  
REELP-1**

Prevent damage done by dry cranking or dry starts on a rebuilt engine. Use this air powered oiler to fill crank-case or fill oil galleys. Some shops loan these out with a remanufactured engine as part of the warranty

# HEAT TABS

## Ensure your work against warranty claims

Heat Tabs are your cheapest insurance against someone else damaging your rebuilt cylinder heads and blocks and causing you to pay for the repairs.

The cost of this insurance is less than \$1 for the time, labor and material. The 250° F heat tab:

- A) Proves the engine was over heated by the driver.
- B) If the tab is removed, the warranty is void.

The center of the Heat Tab will melt if it is exposed to temperatures greater than 250° F.

Simply write or stamp on the customer's work order:

"250° F Heat Tab attached. No warranty if heat exceeds 250° F, or if Heat Tab is removed."

Product #	Description
 HT100	250° Heat Tab with Hole- 100pk
 HT250	250° Heat Tab with Recessed Depression- 100pk

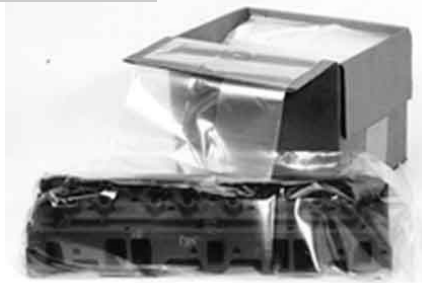

**DEVCON® HEAT TAB ADHESIVE**
